Defence Formation
5-2-1-3

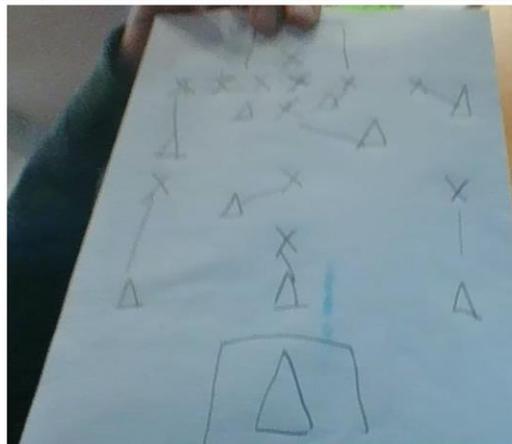

This is my Defence Formation I choose this because my keeper comes up into the back line to make it five and all the players come in to make it narrow so they can't run through the middle where the goal is. All the players are cutting passing lines so it is hard to get to the wide area so they are stuck but if they get there my wing backs can cover. We want them to play back to we can put pressure and win the ball back.

In this plan I have everyone marking a player so when they get the ball they will get shut down and it will give them a harder chance of scoring. If the ball goes through the middle and someone misses a tackle then they will all go for him to shut him down.
